

Puffing Billy: Commissioning of the oil-fired steam locomotive 14A successfully completed

Monday, 16 April 2018 19:49 - Last Updated Wednesday, 18 April 2018 10:45

Commissioning and initial staff training of the oil-fired NA-class steam locomotive 14A has been completed just before the Easter holidays. The primary aim was to ensure steam traction even in times of high fire danger, thanks to spark-free operation of the oil-firing system. Before Diesel locomotives had to be used.
