

DLM and VDW (Verein Dampfzentrum Winterthur = Steam Centre Winterthur) organize a combined steam excursion with steam locomotive 52 8055 and the splendid paddle steamer "Hohentwiel". The "Hohentwiel" is the only surviving paddle steamer on Lake Konstanz. Contrary to the other paddle steamers in Switzerland, the "Hohentwiel" does not provide regular timetabled service. DLM has chartered the ship for the day to enable individual passengers to travel on it. We offer the opportunity to book a combined trip covering steam train and paddle steamer. Those preferring steam train only or cruise only may do so.

Please find more information on the pamphlet (in German) below.
